

PRODUCT INFORMATION

Y•TEX[®] BRUTE[®] Pour-On for Cattle

For economical, convenient, and long-lasting residual control of Buffalo flies & cattle lice on beef cattle.

DESCRIPTION: BRUTE Pour-On for cattle is a ready-to-use formulation containing permethrin, a synthetic pyrethroid highly effective against Buffalo flies & cattle lice.

EFFECTIVENESS: BRUTE Pour-On for cattle can be effective against pyrethroid susceptible Buffalo fly for up to 4 weeks. The length of residual protection against Buffalo flies will vary depending on the level of insecticide resistance within a particular area. BRUTE Pour-On is effective against biting lice and two species of sucking lice.

PACKAGING: BRUTE Pour-On for cattle is available in a ONE LITRE pack with a convenient measuring chamber on top for easy application, a FIVE LITRE Gun Applicator pack and a FIVE LITRE Refill pack.

ACTIVE CONSTITUENT:
87g/L Permethrin*
(25:75 cis:trans)

PRODUCT ADVANTAGES

- | | |
|--|--|
| <p>1 Ready-to-use, no dilution necessary</p> <p>2 Easy to apply - just pour along the backline of each animal.</p> <p>3 Highly concentrated formulation allows for a low volume dose rate - a maximum of 1.5ml per animal.</p> <p>4 Extremely cost effective providing economical residual protection</p> <p>5 A low toxicity formulation with little or no risk of irritation to the skin of animals and operators</p> <p>6 No label contraindications
- can be used with other treatments and medications.</p> | <p>7 Short withholding period.</p> <p>8 ONE LITRE treats 66 head at the maximum dose rate. The FIVE LITRE pack will treat 333 head at this rate.</p> <p>9 Rainfast. Persistence in the hair of animals enhances residual protection.</p> <p>10 Classified as a non-cyano pyrethroid. Crossover resistance to other pyrethroids tend to be lower in this class.</p> <p>11 Can be used in conjunction with Y-TEX Insecticidal ear tags in a strategic insecticide management program for Buffalo fly control.</p> |
