

Y•TEX® 3 WAY

Insecticidal Cattle Ear Tag Rotation Program

Recommendations for the Long Term Control of buffalo fly on beef and dairy cattle (including lactating dairy cattle)...

- A. Use AGRESSOR™ (the gold tag) for 1 year
- B. Use Optimizer (the orange tag) or WARRIOR (the green tag) for the next year
- C. Use PYthon (the purple tag) or PYthon MAXIMA (the blue tag) the following year. Then repeat the three year cycle.

**PROVEN EFFECTIVE AGAINST BOTH
PYRETHROID AND ORGANOPHOSPHATE
TOLERANT BUFFALO FLIES**

Y•TEX AGRESSOR™

Ingredients

ACTIVE INGREDIENTS:

	By Weight
Abamectin (avermectin B _{1a} and avermectin B _{1b})	8%
Piperonyl Butoxide, Technical Min. 80% (butylcarbityl) (6-propyl-piperonyl) ether and max. 20% related compounds.....	20%
INERT INGREDIENTS	72%

Total..... 100%

Packaging

AGRESSOR™ is available in packs of 20 tags and 100 tags (5 sachets of 20 tags each). Each tag includes a male button for attachment.

Insecticidal Cattle Ear Tag

AGRESSOR™ contains a new class of synergised chemical never before used in an ear tag to control buffalo fly on beef and dairy cattle (including lactating dairy cattle)...

AGRESSOR™ is a synergised formulation of abamectin and piperonyl butoxide. This unique chemical compound is ideal for use as a third rotation option in the Y-Tex Insecticidal tag rotation program with OPTIMIZER™, WARRIOR™, PYthon™ and PYthon MAXIMA™ to minimise buffalo fly insecticide tolerance.

Get results with AGRESSOR™...

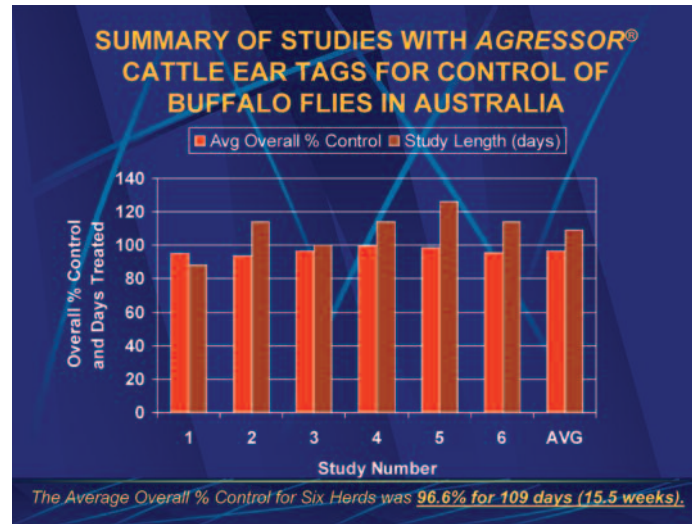

AGRESSOR™ provides sustained pest control potency for up to 12 weeks, which can result in increased weight gains. Lesions caused by *Stephanofilaria* spp., which are transmitted by buffalo fly, are also eliminated, resulting in cleaner, healthier looking cattle.

Description

A new chemical class for insecticidal tags (macrocyclic lactone).

- Synergised with piperonyl butoxide for increased potency
- Unique mode of action
- No objectionable odour
- Guaranteed retention

Efficacy

Knockdown

Fast acting - works without delay, eliminating buffalo flies within one day.

WHP : Meat Nil & Milk Nil

Rainfast

AGRESSOR™ was proven effective in field studies in North Queensland where rainfall in excess of 1,000mm was recorded over the four month trial period.

Rotation of insecticide classes provides maximum control and cost effectiveness...

Without rotation, the repeated use of one class of insecticide will contribute to buffalo fly becoming tolerant to that insecticide. Y-Tex Corporation is the only manufacturer worldwide, that can offer a 3-way insecticidal tag rotation program.

Insecticide Resistance Potential is minimised by Rotation...

AGRESSOR™, PYthon™, OPTIMIZER™, WARRIOR™ and PYthon MAXIMA™ have all been designed to be used in ROTATION of chemical classes. When these tags are strategically used, the risk of insecticide resistance is significantly minimised.
